of labor, pain results primarily from distention of the lower uterine segment and cervix (see Chapter 20).

Medications for Pain Relief During Labor and Delivery - ACOG

An epidural block (sometimes referred to as an epidural) is the most common type of pain relief used for childbirth in the United States. In an epidural block, medication is given through a tube placed in the lower back. For labor and vaginal delivery, a combination of analgesics and anesthetics may be used. You will have some loss of feeling in the lower areas of your body, but you
